

# TOURISM MANAGEMENT

**Tourism** is a community investment that brings *long-term returns* by creating local jobs, supporting small businesses, and diversifying the economy. With thoughtful planning, tourism becomes a *catalyst* for *revitalization*, community *pride*, and shared profitability. Becker Professional Services can help **create and manage** the Tourism Department through your municipality and/or Chamber of Commerce.

Service Area	What We Do	Why It Matters
 Marketing	Craft client-specific branding strategies that highlight the unique local culture, proximity to adventures, and align with the area's economic development goals.	Tourism in Wisconsin generates over \$23.7 BILLION in economic impact and supports more than 174,000 jobs.
 Advertising	By evaluating the key markets and opportunities that are unique for each community, advertising dollars are spent with the most amount of impact.	Advertising turns local charm into economic opportunity. It draws in visitors who support businesses, celebrate culture, and help small communities thrive on a bigger stage.
 Graphic Design	In-house design services to create and support visually compelling materials that elevate a destination's identity.	A strong tourism brand builds emotional connection and sets clear expectations for the traveler. It differentiates a place in a competitive market, whether it's a community of 1,000 or 100,000.
 Administration	Create and streamline workflows, manage bylaw obligations, industry networking, and budget creation and management.	While the spotlight in tourism often shines on glossy magazine spreads and eye-catching billboards, it's the behind-the-scenes work—budgeting, meetings, event calendars, and website upkeep—that forms the backbone of a successful destination strategy.

Partner with us to build a *stronger*, more *sustainable* community!
